Field In Packet Header	Field In NAT Table
For outgoing packet (to the Internet)	
Source IP address	Local IP address
Source Port (or ID)	Local Port or ID
Destination IP address	Remote IP address
Destination Port (or ID)	Remote Port or ID
IP Proto field	Protocol
For incoming packet (from the Internet)	
Source IP address	Remote IP address
Source Port (or ID)	Remote port or ID
Destination port (or ID)	New Port or ID
IP Proto field	Protocol

Figure 25.7 A summary of comparisons performed during NAT table lookup. Lookup compares five fields of an outgoing packet, and four fields of an incoming packet.
